POLISH BROTHER: Brother Zeno Zebrowsky, 78, displays the Fourth Order of the Sacred Treasure conferred upon him by the Japanese Government Tuesday. He is known for his activities helping the orphans and the poor. The Polish brother had been among foreign recipients of orders in commemoration of the Meiji Centenary but the presentation was delayed because the Polish Government failed to respond promptly to the Japanese decision. The orders were conferred upon the other foreigners in February.

Probably the greatest uncer-
tainties relate to the landing, to
working conditions on the moon
and the takeoff. These are the
elements of the mission that
could not be tested in advance
despite a variety of simulations.

Predictions that the lunar
surface was so fluffy or soft that
the LM and its passengers
would sink out of sight were
laid to rest by the surveyors.
The five of them that were suc-
cessful had television eyes that
could be radio-controlled from
earth, scanning the terrain, the
ground alongside the footpads
of the craft and even parts of
